

Medium Sized Controlled Rate Freezer

Kryo 560

A gold standard in the cryopreservation of bone marrow, cord blood and cells, the Kryo 560 is the tool of choice to ensure the best possible clinical outcome.

Whether you wish to freeze 2,900 straws or 48 PALL bags, the Kryo 560 provides a reliable, robust solution.

This top opening programmable freezer is simple to programme and operate, but flexible enough to offer multiple protocols.

Batch freezing is possible using our DeltaT software. Large sample numbers can be deposited in different machines with the subsequent freezing profile for all samples being displayed on the same graph.

The new MR7 controller offers password-controlled access on multiple user levels. Updates and alerts are emailed via WiFi to provide peace of mind and unlimited freezer profile storage enabling the operator to select optimum processing conditions.

Security and safety is of paramount importance. There is password controlled multiple level user access, plus safety features to protect against power and PC failure.

- Flexibility – accommodates straws, vials or blood bags
- User assurance – an approved and proven Medical Device
- QA – internal support with password protection, reporting and temperature graphs
- Scalable – option to control multiple chambers via one interface (batch freezing)
- Post thaw viability up by 20 % compared to non-dynamic freezing methods
